

## Microsoft .NET Framework

Update your computer with the latest version of .NET Framework.

Download the latest version here:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856EACB-4362-4B0D-8EDD-AAB15C5E04F5&displaylang=en>

## Installation for Windows XP

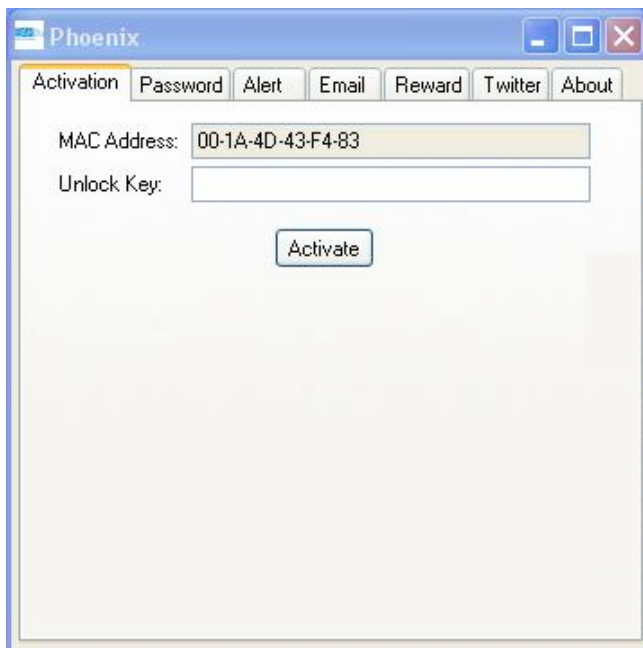

- Double click the file '**Phoenix for Windows XP.msi**' and install it.
- Install **svcsetup.exe** after installing Phoenix setup and following the instruction guide as given.

## Installation for Windows Vista

- Double click the file '**Phoenix for Windows Vista.msi**'.
- Go to the directory where Phoenix for Vista was first installed C:/Program Files/BAK2u/Phoenix for Vista/
- Right click "Phoenix Vista Fix" batch file and select "Run as Administrator". This will install the application fix into Vista.

## Instruction Guide: Configuration

Click the icon 'Phoenix' on the desktop. Enter your own password in the pop up window.

## Registration

Go to <http://www.bak2u.com/activate> (**Windows OS**) and enter the necessary details in the form together with the **Activation Pin** (refer to vendor for more details).

Enter the given **Unlock Key** as displayed on the webpage into the given 'Unlock Key' on the program at your desktop (see image below). Press '**Activate**' to register the program.

### Password

Select the tab '**Password**' to change your password to access the program.

Use the bar to select the countdown timing e.g. 60 seconds.

### Alert

Select the tab '**Alert**' to customize your alert message.

E.g. Alert! Ken's Packard Bell laptop Model EasyNote BG 46-023 has been stolen!

Set the number of times the alert message(s) is send out within the number of minutes.

### Email

Select the tab '**Email**' to set the email address to receive the alert.

You may like to verify the settings with your internet service provider if you are unsure.  
Hint: Refer to your email account settings in your existing email program (E.g. Outlook)

### Recipients

Enter the email address that you like to send the alert to. For example, another email address that you own that is not in the same laptop/desktop.

Hint: You may like to set up a new gmail account to receive the email alert
